Typical Personal Author Index Listing

Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e. g. NASA report, translation, NASA contractor report). The page and accession numbers are located beneath and to the right of the title, e. g. p0092 N79-12073. Under any one author's name the accession numbers are arranged in sequence with the /AA accession numbers appearing first.

Typical Contract Number Index Listing

Listings in this index are arranged alphanumerically by contract number. Under each contract number, the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order with the /AA accession numbers appearing first. Preceding the accession number is the page number where the citation may be found.

Typical Report/Accession Number Index Listing

Listings in this index are arranged alphanumerically by report number. The issue and page number indicate the actual Supplement and page where the citation may be located. The accession number denotes the number by which the citation is identified. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.
